5. Full Stack Developer | Problem Solver | Enhancing User Experience with Modern Tech & Optimized Solutions

## LinkedIn About Summary

I am a Full Stack Developer with 6+ months of professional experience at a fast-paced startup, where I've worked on end-to-end development of a society payments and security application. My work spans across technologies like Node.js, JavaScript, SQL, Firebase, ASP.NET, and Bootstrap, with a strong focus on delivering scalable and user-friendly solutions. In my role, I've contributed to building responsive and optimized UIs, integrating OTP verification, enhancing user experience using libraries like Canvas, and implementing real-time features such as chat, polls, and notifications. I've also worked on critical backend improvements, including sending automated reminder emails, enabling receipt downloads, and optimizing server performance to reduce delays. My core strengths are problem-solving and optimization. I enjoy analyzing complex challenges, simplifying workflows, and creating solutions that not only work but work efficiently. I believe that great software balances usability, performance, and scalability, and I strive to bring this mindset into every project I contribute to. I am now looking to bring my skills and experience to a dynamic team where I can contribute to impactful projects and continue growing as a Full Stack Developer. ■ If you're looking for a problem solver who can deliver efficient, reliable, and user-focused solutions, let's connect.

## Optimized Job Experience

Full Stack Developer Vengurla Tech Pvt Ltd | Mar 2025 – Present - Built and optimized a society payments and security application used by residents for real-time transactions and communication.

- Designed and delivered a responsive, user-friendly UI, improving accessibility and reducing user drop-offs.
